25X1

1. Mavag Motor Factory

The daily output of the Mavag Motor Factory in Budapest is 40 vehicles.

2. Diosgyör Heavy Machine Tool Factory

This factory is producing gun barrels. About 60% of these are 85 mm. and are destined for antiaircraft guns and tank weapons.

3. Balatonfüred Shipyard

About 20 armored motorboats are being built here, for the technical and river troops of the Hungarian Army.

1. Comment: The manufacture of 37 mm. antiaircraft guns is to be transferred to Györ. At the beginning of 1952, a factory called the Györ Machine Tool Factory was built for the manufacture of such weapons and smaller caliber guns. The factory is located on the premises of the Györ Industrial Works. Thus the Diosgyör Works can concentrate on the manufacture of larger caliber guns.
